

Preventive health check-up for international students

You are new to the University Marie et Louis Pasteur. The entire team at the Student Health Service warmly welcomes you to Besançon.

It is essential to contact the Student Health Service (SSE) in Besançon to have a preventive health check-up. This check-up **is free of charge**. It will give you an opportunity to review your health. The confidentiality of the interviews is guaranteed by professional secrecy.

Initially, you will have a consultation with a nursing officer. She will review with you about your student life and vaccinations. If you have in your possession a health record or vaccination card, please bring it with you. A biometric (weight, height, eyesight, hearing test, etc.) will be carried out.

The various resources and referrals available to you, depending on your needs, will be suggested to you.

To have your health check-up, you need to make an appointment with the secretariat of the SSE:

- **by phoning us on + 33 (0)3 81 66 61 30**
- **by going to our reception desk at 45 C avenue de l'Observatoire, 25000 BESANÇON** (opposite the "Petit Bouloie" University Restaurant, please look at the map)
- **Online via Doctolib**

Consultations in English are scheduled on Tuesday afternoons. The service is open from Monday to Friday from 8am to 5pm. If required, a certificate of attendance will be issued at the end of the visit.

Please note that the SSE is not a health center: the doctors in this department therefore cannot be your regular doctor.

See you soon for your check-up !
